COPIBEC PRESENTS GET IT NOW

- Is interlibrary lending not meeting all your users' needs?
- Do your users want faster access to articles with immediate delivery?
- Do the different ordering and invoicing procedures on publishers' websites make it complicated to obtain articles?

GET IT NOW IS THE SOLUTION!

Get It Now was created by the U.S. Copyright Clearance Center (CCC) and is made available in Quebec by Copibec.

Affordable, easy to use and fast, it gives teaching staff and students direct access to scientific journals and specialized publications from leading publishers all over the world.

It's the perfect complement to interlibrary lending.

FAST, DIRECT AND COST EFFECTIVE

Get It Now is **available 24/7** and installation is free.

You pay only the cost of the ordered articles and an annual fee corresponding to 5% of the total purchase amount.

The selected articles are generated as high-quality PDFs delivered by email in under an hour directly to teaching staff, students or librarians.

INTEGRATED INTO YOUR LIBRARY CATALOGUE

Users start by searching your library holdings and selecting the relevant articles.

The Get It Now option is displayed only if the selected article cannot be obtained through an existing subscription at your institution.

MEDIATED VERSION AVAILABLE

What if your library catalogue doesn't have a link resolver such as OCLC, Ex Libris or EBSCO? No problem! With Get It Now's Standalone Basic option, the person in charge of interlibrary lending can use the Dashboard to order the relevant articles.

When a user makes a request, you simply check whether the article is available through Get It Now and submit an order immediately. The article is emailed right away to the library or directly to the user, according to your needs.

TRACK YOUR SPENDING

The Dashboard lets you customize how you use Get It Now and gives you full control over your budgets.

For example, you can:

- Designate who has access to Get It Now
- Authorize access only through your institution's email addresses
- Limit the number of requests per user or set a purchase limit
- Be notified via email when you're nearing your limit
- Generate usage reports

REPRODUCTION AND USER SUPPORT

After articles have been purchased through Get It Now, they can be reproduced under the terms of the Copibec reproduction rights licence issued to your institution.

Copibec takes care of distributing Get It Now and supporting users in Quebec.
